

Table S1. BNSER Dataset Composition

Emotion-wise distribution across the corpus and the speaker-independent dataset partitions.

Emotion	Scripted	Drama	Total	Train	Validation	Test
Angry	300	100	400	281	59	60
Disgust	300	100	400	281	59	60
Fear	300	100	400	287	58	55
Happy	300	100	400	281	59	60
Neutral	300	0	300	200	50	50
Sad	300	100	400	280	60	60
Total	1800	500	2300	1610	345	345

Note: The corpus contains 2,300 samples: 1,800 scripted and 500 drama-derived.

Note: Neutral contains no drama-derived samples because the drama recording subset did not yield a reliably identifiable neutral category.

Note: Values reproduce the revised manuscript dataset-distribution table.
